

FOOD SAFETY POLICY

We are committed to

- Adhering the best practices to manufacture, pack and deliver sugar from sugarcane that meets the highest food safety and quality standards.
- Complying with all applicable statutory, regulatory requirements and customer specifications.
- Sustaining food safety and quality performance through implementation of food safety management system.
- Verifying the effectiveness of the food safety management system through internal and external audit processes.
- Educating and imparting knowledge to all employees about food safety and their role through structured programs, seminars and by all other possible means.
- Reviewing continuously the policies, standards and procedures to effectively manage the food safety risks associated with change in processes and technology applied.
- Setting measurable FSSC objectives in compliance with all standards.
- Ensuring suppliers and contractors to embrace the same commitment towards safety and quality by monitoring the materials and services supplied through audits and inspections.
- Communicating in timely and effective manner, the food safety aspects and our requirements to suppliers and contractors by establishing specifications for all supplies and services.
